

Organized by

Thai Society of Microcirculation

# 8<sup>th</sup> Asian Congress for Microcirculation

OCTOBER 2011, Thailand

**Theme:** "Microvascular Biology and Bioengineering towards Regenerative Medicine"

**Program:** Scientific Sessions will include Plenary Lectures, Symposia, Free Communication

## Announcement and Invitation

*On behalf of Thai Society of Microcirculation, I would like to invite the Asian Union for Microcirculation to stage the VIII ACM in Bangkok, Thailand in the year 2011. The proposed location of the congress is Centara Grand Bangkok Convention Center at Centralworld, the world class international convention and meeting center fully equipped with all facilities, in the center of Bangkok, one of the most fascinating cities in the world.*

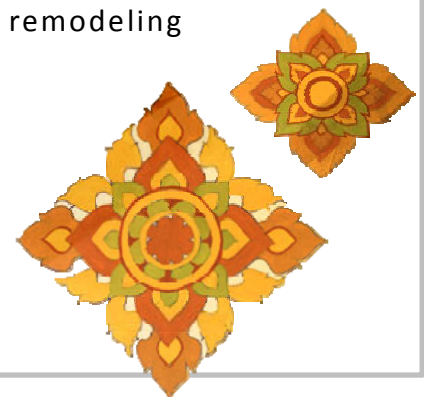

*The last ACM conducted in Thailand in 1997 was the inaugural event for the Society. At the Congress 11 years ago, the colorful program and lively social affairs were appreciated and are still fondly memorized by all the participants. We are hoping to see you all again in 2011. We will make every effort to host the successful VIII ACM.*

P. Futrakul

(TSM President)

## Categories of Research Submissions

- ✦ Aging
- ✦ Angioadaptation
- ✦ Angiogenesis
- ✦ Biomaterials & drug delivery
- ✦ Biotechnology & instrumentation
- ✦ Diabetes mellitus & obesity
- ✦ Inflammation
- ✦ Microvascular imaging
- ✦ Tissue engineering
- ✦ Vascular remodeling
- ✦ Others
